VOL. XXI

SOUTH SAN FRANCISCO, SAN MATEO COUNTY, CAL., SATURDAY, APRIL 18, 1914.

NO. 16.

CUNNINGHAM AND WALLACE ELECTED CITY TRUSTEES

In the election contest in this city last Monday City Trustee F. A. Cunningham was re-elected and Geo. H. Wallace elected city trustees. W. J.

F. A. Cunningham.

Smith was re-elected city clerk and E. P. Kauffmann elected city treasurer.

Following is the result of the votes cast:

Precinct No. 1—Trustee—F. A. Cunningham 244, Geo. H. Wallace 190, Peter Lind 164. Clerk—W. J. Smith 192, Roy C. Morton 172. Treasurer—E. P. Kauffmann 308.

Precinct No. 2—Trustee—F. A. Cunningham 58, Geo. H. Wallace 137, Peter Lind 125. Clerk—W. J. Smith 134, Roy C. Morton 33. Treasurer—E. P. Kauffmann 138.

THOSE ELECTED IN OTHER SAN MATEO COUNTY CITIES

Daly City.

Trustees—S. A. Landini, C. L. Biebel, T. P. Moran. Clerk—Geo. N. Smith. Treasurer—T. Sheehan.

Burlingame.

Trustees—Long Term—Wm. H. Pearson, Wm. Waters. Short term—E. V. Chevalier. Clerk—James R. Murphy. Treasurer—John V. Doherty.

Hillsborough.

Trustees—Rev. Wm. A. Brewer, Henry T. Scott, Norris K. Davis. Clerk—John A. Hoey. Treasurer—Chas. T. Crocker.

Redwood City.

Trustees—H. C. Tuchsen, E. Sampson. Clerk—G. C. Plump. Treasurer—Frank Towne.

Lost—A gold locket containing picture of two babies. Return to Post office and receive reward. Advt.

The Value Of Money

There is no more important lesson to learn than the value of money.

Do you know it? Are your children learning it? Earning and saving money is a sure way to learn its value.

If you can earn money, the Bank of South San Francisco can help you save it by protection and 4 per cent compound interest.

Bank of South San Francisco
COMMERCIAL SAVINGS

LOCAL HAPPENINGS TOLD IN BRIEF

Mrs. A. Swanson was in town Wednesday.

Mrs. J. O. Snyder entertained a bridge party Monday afternoon.

Warren Turner and Joseph Killian spent Thursday evening here.

Alex Greenwood, formerly of this city, was a visitor here Wednesday.

The whist club was entertained by Mrs. George W. Holston, Thursday evening.

The work of installing a new water main along Linden avenue extension is nearly completed.

Mr. and Mrs. D. Palany returned home last Monday, after a month's visit in Reno, Nevada.

Mrs. George A. Kneese was called to Mountain View last Thursday by the death of a friend.

Dave Martin arrived home from Fresno, with his friend Royle Carter, to spend the week end.

Mrs. L. P. Laird and daughter of Livingston, California, is visiting her niece, Mrs. H. B. Wood.

C. W. Smith returned Thursday from Cazadero, where he spent several weeks hunting and fishing.

Mrs. Luce and two daughters of San Francisco spent Tuesday as the guests of Mrs. Al Eschelbach.

Harry Holston of San Francisco has been visiting his brother, City Trustee Geo. W. Holston this week.

Geo. David, who has been at the South San Francisco General Hospital for several weeks, is able to be around again.

Elmer Grant Keith, pastor of the Modesto Methodist Church, spent Monday night at the home of his son, Dr. I. W. Keith, in this city.

A. P. Bellisle, one of the proprietors of the Daily News and Weekly Leader of San Mateo, was a visitor to this city last Wednesday.

Miss Bernice Todt has been visiting Mrs. Thomas L. Hickey for several days. Miss Todt spent most of her school days in South San Francisco.

T. Thielon, foreman at the Pacific Car and Equipment Co. shops was painfully injured Wednesday afternoon when a flying chisel struck him in the left eye. Fortunately he will not lose his sight.

The party of soldiers which encamped near this city last Wednesday was composed of twelve companies of the 12th Regiment, comprising 600 men. They were on their way to Palo Alto, where they will enjoy an encampment for six weeks.

The Hub has put in an assortment of piece goods for made-to-order suits for men and women. Select your cloth and have a first-class suit made at this store, 313-315 Grand avenue. Chas. Guidi, proprietor. Advt.

A linen shower was given by Miss Lucile Bell at her home in San Francisco, in honor of Miss Lena Elkerten.

(Continued on Page 4.)

AUTO ACCIDENT ON BOULEVARD FRIDAY

Last night about 6 o'clock an automobile containing two men, driven by a member of the San Francisco police force turned turtle near the wooden bridge on the boulevard, this side of Holy Cross Cemetery. The machine, which was purchased by the driver yesterday morning was traveling about 50 miles an hour when the accident occurred.

Geo. L. Perham of San Mateo passed in his machine just after the accident. He saw the damaged machine and stopped and picked up several belongings of the two men, but was unable to find a diamond stick pin said to have been dropped by one of the men.

The men were taken to the South San Francisco General Hospital where one had his nose, which was badly broken, reset. The policeman, the more unfortunate of the two, had his head painfully hurt.

FRATERNAL ORDERS

(By Harry Edwards.)

W. J. Bryan says, "In the lodge room we do not ask who his father was; we simply inquire what he is. We do not ask what his father has done; we simply ask him if he is ready to do the work that falls to him. We do not ask him whether he has received a diploma from some institution of learning; we simply ask him if he has studied the science of 'Right Living,' if he recognizes the ties that bind him to mankind. We do not ask him how many acres of land he possesses; we do ask him whether he is possessed of the spirit of brotherhood and whether he counts all as entitled with him to the benefits of civilization and to the helps that come therefrom. The lodge room helps to draw us together, it helps to unify the world, it teaches the spirit of brotherhood."

F. O. E.

No Eagle residing in this vicinity will fail to attend the memorial service to be held at Colma Hall, Colma, Sunday, April 19th (to-morrow). The program will prove equal to any heretofore given by this order. Kenneth Green, worthy president of San Mateo Aerie, will be the orator of the day. The program, though a lengthy one, is well arranged. Local celebrities, some of whom will be heard in public for the first time in sacred song, will be presented, while others well known to us will appear. May the members and friends of this splendid order gather together promptly at 2 p. m. in Colma Hall, that we may honor by recalling the virtues of our brothers departed. They cannot come to us; we must go to them.

I. O. R. M.

The annual memorial service of the Imp. Order of Redmen, in the hunting grounds of San Francisco and San Mateo county, will be held in Beth Israel Synagogue, San Francisco, May 19th. Chiefs of Tippecanoe Tribe, No. 111, will kindly take note of date and place.

L. O. O. M.

San Francisco Lodge, No. 26, Loyal Order of Moose, will hold its annual memorial service Sunday, May 3d, at the Moose Auditorium, Page and Jones streets, San Francisco. Nearly 100 members have passed away during the year. The members of local Moose lodges and friends are invited to be present. A fine program has been arranged.

RESOLUTION OF CONDOLENCE.

The following resolution was unanimously adopted by Fraternal Brotherhood Lodge, No. 850, at its meeting held on April 13th:

Whereas, We know with deep regret and profound sorrow, of the death of Mrs. Miller, mother of Brother DeLange, our worthy secretary; and

Whereas, The hearts of the members of this lodge have been moved to sympathy for the bereaved brother; now therefore be it

Resolved, that the heartfelt condolence of this lodge be extended to said brother in his hour of bereavement, and as a testimony of our sincerity, that a copy of these be spread on the minutes of this lodge, and a copy sent to The Enterprise for publication.

Do You Want a Home?

The South San Francisco Land and Improvement Company will build you a house on any lot in South San Francisco, on very easy terms. Select your lot, choose your design and apply at the Company's office, 306 Linden avenue, for full particulars.

COUNTY CANDIDATES, TAKE NOTICE!

PROCEEDINGS OF THE CITY BOARD OF TRUSTEES

The city board of trustees met in adjourned session in the city hall last Tuesday evening.

A resolution of intention providing for the extension of Grand avenue on a more direct line to Mission road, introduced by Trustee Hickey, was adopted, upon motion of Trustee Holston, seconded by Trustee Kelley.

Upon motion of Trustee Hickey, seconded by Trustee Holston, the local land company was given a vote of thanks for the offer of a right of way through its land for the new Grand avenue extension to Mission road.

A resolution adopted by the executive committee of the local land company assuming responsibility for all claims or damages caused by the closing of certain streets in this city, was read and ordered filed.

Upon motion of Trustee Holston, seconded by Trustee McGovern, the application of John Colombo for permission to transfer his Class A liquor license from the Klotz building to the Baden Hotel on Linden avenue was laid over to be acted on next Monday evening, when the new board will organize.

Superintendent of Streets Kneese was directed to have sewer laterals constructed in Linden avenue, between Aspen and Armour avenues, and in Baden, between Maple and Linden avenues.

An ordinance fixing water rates for the fiscal year 1914-1915 was, upon motion of Trustee Holston, seconded by Trustee McGovern, adopted.

Several claims against the city were allowed and ordered paid.

BASEBALL

The South City Merchants journeyed to San Francisco last Sunday to play the Potrero Merchants. Owing to some raw decisions of the umpire for the city team the score was 3 up. The battery of the local team upon which most of the work fell, was composed of Cliff Lodge and Will Castro. The mound work of Castro was amazing, even to the members of his own team. He garnered seventeen strikeouts to his already good record. Lodge, behind the bat, also showed rare judgment, and between the two of them they had the city boys guessing.

To-morrow the Merchants will play the Chadwick Outlaws on the local grounds at 11 a. m. The game is expected to be exciting, as the two teams are almost evenly matched, with the Outlaws a little to the good. Show up at the local grounds and enjoy yourself. Adults 15 cents, children, 10 cents.

\$25 RAISED FOR EL CAMINO REAL BELL.

Mrs. Martin sent to Mrs. C. E. Cumbernon at Redwood City the sum of \$25 for the bell to be placed on Mission road at the intersection of the new Grand avenue extension. Mrs. Martin's extends thanks to the kind subscribers for their aid in obtaining "Our Bell."

For Sale—A modern house, with barn, chicken coops, etc., in Peck's Lots; a snap for a quick sale. P. O. Box 502. Advt.

See the fine line of Women's Spring and Summer Waists, from 65 cents to \$3.50, at Schneider's. Advt.

HOT WATER

The economy of heating water with GAS is apparent when it is considered that you consume fuel only when you need hot water.

It is not necessary to keep a fire going all day to get hot water now and then. Both health and cleanliness demand hot water. And the easiest, most economical and most satisfying way to get it is to use GAS.

Have you "PACIFIC SERVICE" in your home?

Pacific Gas and Electric Company

SOUTH SAN FRANCISCO

WASHINGTON LETTER

(Special Correspondence.)

Complete repudiation of the Wilson Democratic policy of the proposed repeal of free tolls for coastwise American ships through the Panama Canal has been expressed in no uncertain terms by the people at the polls.

The Wilson administration, figuratively speaking, has been kicked hard under the coattails by the American people, who will never stand for a cowardly and base surrender to Great Britain of our rights for American ships in the Panama Canal.

People Reject Tolls Surrender.

The issue was clear cut. There is nothing to misunderstand about the verdict of the people on the Wilson "scuttle" Panama tolls policy—they manifested their displeasure at this Democratic but un-American policy in the New Jersey, Boston and Alabama elections.

In the Seventh New Jersey district Dow H. Drukker, a straight Republican, overwhelmingly defeated for Congress the Democratic administration candidate, James J. O'Byrne. Drukker made his fight solely on opposition to tolls repeal; O'Byrne was the administration pet and stood for repeal. Despite desperate efforts of the administration which sent Senators James and Lewis into the district, and the fact that this district is in the President's home state, the patriotic voters, as a protest against free tolls, repudiated the Democratic candidate and elected Drukker by more than 5,000 majority over O'Byrne. Senator James, speaking for O'Byrne through the district declared if O'Byrne was not elected a great "insult" would be given President Wilson. Evidently the people of the Seventh New Jersey were aching to "insult" the President. It was a "crowning insult" to the administration.

In Boston James A. Gallivan, Democrat, running on an announced platform of opposition to repeal of free tolls, was elected to Congress from the Twelfth Massachusetts. Gallivan boldly repudiated the administration free tolls policy and the people backed him up with their votes.

In Alabama Majority Leader Underwood was elected to the United States Senate by a great majority. He, with Speaker Clark, are the principal opponents of free tolls in the House. Underwood's stand against free tolls rolled up his great majority against Hobson, his opponent, who was silent on the tolls question.

Administration Severely Jolted.

The administration is deeply chagrined over these unmistakable evidences of what the people think of the proposed surrender of our canal rights to Great Britain. When the reports of the New Jersey election arrived at the White House the President was reported to be "stunned" at the news. Democratic leaders in House and Senate look harassed and downcast.

Senator Burton, of Ohio, who favors repeal, seeing the handwriting on the wall, has announced he will not be a candidate for re-election.

Hearings Are Forced.

Democratic and Republican Senators alike, who oppose the tolls "scuttle" policy, have forced hearings on the repeal question by the Senate Intercoastal Canals Committee and these are now on. A delegation of Californians, headed by William R. Wheeler, of San Francisco, are scheduled to be heard April 21st in opposition to repeal. California is reported here to be almost to a man against Wilson and his remarkable scheme. The California delegation will vigorously oppose repeal. The California Congressional delegation, with the exception of Representatives Church and Kent, are against repeal. Church and Kent voted for repeal in the House. The other House members, headed by Representative Knowland, voted against repeal.

Startling Canal Sale Reports.

Is the Wilson administration, not content with its dastardly attempt to surrender rights for American coastwise ships through the Panama Canal, secretly dickering with Great Britain and other European nations to turn over the canal, lock, stock, and barrel to the world, to be used as a neutralized international waterway?

Startling assertions were published recently in Washington to this effect.

These reports were denied at the White House the next day, but so many denials have come from the White House when the Democratic administration has been caught "with the goods" in many nefarious transactions that denials from that quarter are now taken by the Washington public for what they are worth. Anything can now be expected from Wilson and Secretary Bryan.

Say Wilson Administration Doomed.

There are not wanting political prophets here who declare that the single issue of tolls repeal will cause the next House to have a big Republican majority and that the recent elections sounded the knell of the Wilson administration in 1916.

Knowland in California.

Representative Knowland has gone to California for a three weeks' trip in the interests of his candidacy for the Republican nomination for United States Senator. Among the California Congressmen and other Californians here the opinion is general that Knowland will easily be nominated and

elected Senator. He will be obliged to hasten back to Washington within a short time as his presence is necessary to lead the fight here against tolls repeal. Knowland is considered in Washington the foremost Congressman in the fight to prevent surrender of our canal rights to Great Britain. He is dean of the California Congressmen and led the fight for free tolls for American coastwise ships when the Panama Canal act was passed.

Knowland will be in the thick of the great battle now being waged between the Wilson administration, which is trying its best to give away an American birthright for a mess of British pottage, and the patriots of all parties in House and Senate who are unalterably opposed to this proposed treachery to the American people.

PAROLE RULE IS DECLARED ILLEGAL

In an opinion handed down by the Supreme Court the rule made by the State Board of Prison Directors, that a prisoner must serve half his term before applying for a parole, was declared to be illegal and void. Henceforth first-term prisoners not serving life imprisonment nor serving two consecutive or cumulative terms, may file an application for a parole as soon as they have served one year.

According to lawyers this opinion makes the ratio of probabilities to a slightly greater degree in favor of the criminal. Attorney George B. Keane was one of the first to read the decision, and he intimated that Abraham Ruef would take advantage of it immediately and make formal application for parole. One-half of Ruef's net sentence is four years and five months.

Therefore under the Prison Directors' rule he would have to wait until August, 1915, before filing such application.

The proceeding before the Supreme Court was for a writ of mandate, petitioned for by James H. Roberts, a prisoner in San Quentin, sentenced July 18, 1912, to five years on a felony charge. He asked the Court to compel the Prison Directors to hear his application for parole, which, under their rule, known as Rule No. 5, they could not do. He had served one year and two months, but not one-half of his term. The Supreme Court granted the writ, and his application will be heard.

The opinion was written by Justice Lorigan. Justice Shaw wrote a dissenting opinion. The Court holds that the Prison Directors have full discretion as to the regulation of the conduct of prisoners who are on parole, but it holds that the Board may not say when it shall begin to exercise this power. The statute provides that first-termers not under sentence for life or serving consecutive terms may apply for parole after one year of imprisonment. The Court says that Rule 5 of the Commission is an attempt to restrict this right, and therefore is void.

In its opinion the Court does not hold that the Directors are compelled to grant parole after one year of imprisonment, but only that the Directors at that time must listen to requests for parole privileges presented by eligible prisoners.

IMPORTANT FOREIGN NEWS

Further progress toward convalescence was announced in the surgeons' bulletin regarding the condition of King Gustave of Sweden, issued from the Sophia Hospital, Stockholm, where his majesty was operated on for ulceration of the stomach.

The selection of Count Shigenobu Okuma, Japan's foremost progressivist, who is engaged in forming a Cabinet to replace that of which Count Yamamoto was head, has created a profound impression in Tokio. All classes consider that it denotes the dawn of a new epoch in Japanese history in the direction of a more representative government. Business men especially are pleased with the choice of Count Okuma by the elder statesman and the stock market is buoyant.

The Palo Alto Interchurch Federation joined in zealous unison in preparation for revival meetings to be held there from April 16th to May 12th, and with a number of men from the Methodist, Baptist and Christian churches, built in eight hours a frame structure big enough to hold 1000 people, and christened it the Tabernacle. Carpenters, clergymen, professors and business men joined in the work, and after eight hours of steady labor, from 8 a. m. to 4 p. m., erected a large structure at the corner of University avenue and Bryant street. The meetings to be held are the continuation of a series lately working in Napa, Vallejo and Berkeley.

U. S. FLEET IS ORDERED TO SOUTHERN WATERS

Rear-Admiral Badger to Lead Great Armada to Tampico

President Wilson has ordered practically the entire Atlantic fleet to Mexican waters to force a public salute to the Stars and Stripes from the Huerta government as an apology for the arrest of American marines at Tampico last Thursday.

No ultimatum has been issued—that is, no specified time has been set within which the Huerta government must comply, but the naval demonstration has been ordered as a concrete evidence of the fixed determination of the United States to back up Rear-Admiral Mayo's demand for a salute.

"Future developments depend upon Huerta himself," was the way a high administration official close to the President summarized the situation.

The decision to send the fleet was reached after the President and Secretary Bryan had conferred for an hour with John Lind, personal representative of President Wilson in Mexico, and after a two-hour cabinet meeting, during which dispatches from Charge O'Shaughnessy revealed that the Huerta government disputed the right of American marines to be ashore at Tampico and contended that its recent public statement of apology was ample.

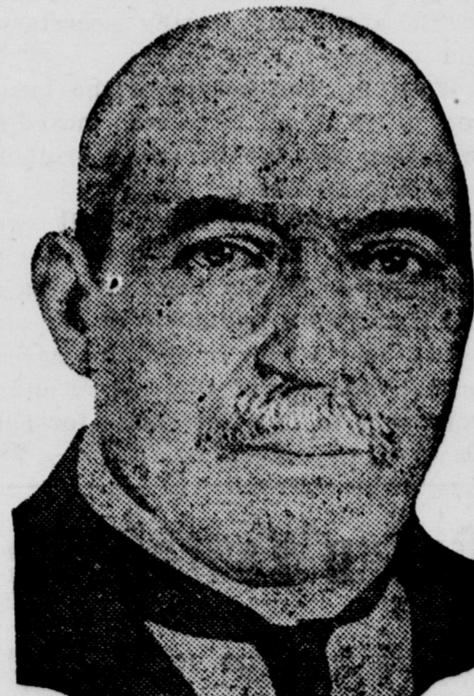

Immediately after the cabinet meeting Secretary Daniels issued his order

REAR ADMIRAL C. J. BADGER
In Command of the Atlantic Fleet

to the Atlantic fleet and wireless messages flashed up and down the Atlantic coast to put the fleet under steam for Tampico. It will be the largest fighting force the American government has assembled for possible action since the Spanish-American war. Eleven great battleships, with auxiliaries, carrying in all about 15,000 men, will comprise the force off Tampico.

Everywhere, at the White House, the State Department and the Navy Department, the hope was expressed that the dispatch of the fleet would not lead to serious consequences, and there was a confident prediction among administration officials that General Huerta would see the wisdom

GEN. VICTORIANA HUERTA
Dictator of Mexico

of satisfying the American demand and close the incident. Officials were careful to point out that negotiations with the Huerta government had not ended and that the way was still open to General Huerta to make amends.

The status of the case as summed up by cabinet officers and other officials familiar with the messages that have been passing between Rear-Admiral

Mayo, Charge O'Shaughnessy and the Washington government was described as follows:

"Assistant Paymaster Charles Copp and a boatload of marines landed at Tampico last Thursday to obtain supplies. They were arrested but later discharged. In accordance with regulations in all navies of the world, Rear-Admiral Mayo, on considering that an unwarranted arrest had been made and that the uniform of the American Navy had been disregarded, demanded reparation in the form of a salute of twenty-one guns."

The American flag, while not taken ashore, was flying at the stern of the whaleboat, and all the marines were in uniform. Rear Admiral Mayo allowed the Huerta commander until 6 o'clock that evening to fire a salute, but later extended the time in order to afford the local commander an opportunity to communicate with his superior officers in Mexico City. A statement of apology was issued in Mexico City by General Huerta, and the local officer who arrested the marines was ordered punished.

This did not satisfy the United States government and the salute was insisted upon. General Huerta himself at no time agreed to comply, but an under secretary in the Mexican Foreign Office did inquire of Charge O'Shaughnessy if a salute fired to the gunboat Dolphin and responded to by the American ship would be acceptable. This was emphatically rejected by the United States and word was sent that nothing short of a public salute to the American flag would be satisfactory.

PANAMA EXPOSITION NEWS

Standing on the top of the dome of the Manufacturers building in the exposition grounds, Miss Mary Elizabeth Payne planted the Stars and Stripes, while the contractors, builders and laborers cheered the ceremony that marks the last stage in the construction of the great display hall. Visitors to the exposition grounds paused in their inspection to watch the courageous young woman, who is well known in San Francisco as a talented soprano, as she was being nailed into an improvised basket on the ground floor. A long line of workmen manned a rope, and she was hoisted 175 feet on the inside of the building to the summit of the great dome.

The Petit Parisien, which is regarded as a Government organ of France, publishes a pungent article regarding the Panama-Pacific International Exposition. It quotes the president of the Chamber of Commerce as saying that France must abstain from participation until the United States adopts less rigorous measures in her customs department and ceases the examination of the French business accounts as well as revising the laws against the importation of plumage. It adds that negotiations between the two Governments have not been broken off, but that it is necessary for the French Government on behalf of French commerce to maintain a firm attitude to show Americans that they are grossly exaggerating matters.

The success of the operation performed several weeks ago at the Baltimore Eye, Ear and Throat Hospital, in which the cornea of a pig's eye was grafted into the blind eye of David Kane, a six-months-old infant, is now practically assured. Dr. Floyd B. Whitman, the surgeon who performed the operation, still refuses to make a statement with reference to it, but it is learned that the optic on which the pig's cornea was grafted is still clear. There is every reason to believe that it will remain clear for the few days left of the time allotted for a test by the surgeon. And if by the end of this week the eye has not clouded, the mother of the infant will probably be able to take him from the hospital, practically entirely cured of the blindness in which he was born, and seeing through a pig's eye.

Keen interest in the recently organized farm bureau at Stockton was evidenced at a meeting held at the Chamber of Commerce, when it was reported that the membership has now grown to 208 in less than a month and that of the thirteen districts in the county nine of them had named their directors. John P. Irish Jr., secretary of the Chamber of Commerce, has been elected permanent secretary of the bureau. The directors elected are as follows: Ripon, J. P. Watkins; Linden, Edgar L. Davis; Manteca, E. Powers; Stockton, J. F. Peters; Thornton, P. A. Kise; Lodi, H. T. Bailey; Holt, R. G. Cope; Acampo, Mr. McCausland, and Tracy, W. M. Smith. Escalon, Farmington, Woodbridge and Lockeford have not organized.

OCCUPATIONS EFFECT TEETH

Jobs Wherein Worker Is Apt to Have Achting Molars.

If your teeth are bad change your occupation.

It is quite likely that the cause of teeth decay can be located. The majority of cases, next to that of neglect, are caused by the work pursued by the man who has bad teeth. Dr. Hesse, a dental specialist of Leipsic, is the authority for this. Dr. Hesse is making a study of occupations in relation to the care of the teeth and he finds that there is a great relation between the two.

Bakers are quite likely to suffer from decayed teeth, says Dr. Hesse. A baker, therefore, in order to keep his teeth sound and healthy, must take much better care of them than the average individual. The cause for bad teeth among bakers is that flour enters the mouth during work. This flour collects on and around the teeth, where it decomposes and generates an acid which is very destructive to the dentine.

Quicksilver miners follow the most unhealthy trade in the world. They cannot take care of their teeth. The fumes of the mercury produce constant salivation and the system becomes permeated with the metal. Soon after this the teeth of the unfortunate men fall out. But it is not the teeth alone that are affected by the quicksilver. The men employed in quicksilver mines soon lose their appetite and become emaciated. If they keep on working in the mines they do not live more than three years.

Chloride of lime, employed by bleachers, frequently destroys the enamel and dentine of the teeth. As chloride of lime is used in many factories, those who come into contact with it are in great danger of serious teeth trouble.

Phosphorous, used largely in the making of matches, is another substance greatly injurious to the teeth. As many women and children are employed in match factories, and as they do not understand its dangers, phosphorous is doubly dangerous.

Soda is dangerous for the teeth, too. People who work in soda factories are affected in a peculiar way, their teeth become translucent, then soft. If not treated in time and if they continue at the factory where soda is used, the teeth break off close to the gums.

WORSHIP A SACRED TOOTH.

Molar Was Brought to Ceylon in the Sixteenth Century.

At Kandy, in Ceylon, is kept Buddha's tooth, which is the object of the unbounded reverence of more than 400,000,000 people.

When this holy molar was brought to Ceylon in the sixteenth century Kandy was only a mountain village. Now thousands of pilgrims go every year to the gorgeous temple where the tooth repose, bringing gifts of every kind, gold and silver ornaments, coins, jewels and even fruit and flowers.

The kings of Burma and Siam send annual contributions toward the support of this temple that holds the sacred relic, which has a rather strange history.

It is said to have been the left eye-tooth of Buddha and to have been taken from his ashes 2500 years ago. For centuries it was the marriage dower going with certain favored princes.

In the fourth century after Christ it was taken from India, then the Malabars secured it. It was afterward captured by the Portuguese, who took it to Goa, where it was burned in 1560 by the archbishop in the presence of the viceroy of India.

But a spurious tooth had to be provided to effect an international marriage, and the molar of a wild boar or ape was used. Its demensions show that it could not be a man's, for it is two inches long and one inch in diameter.

On important occasions it is displayed, but only at a distance. It is sometimes carried in processions on the back of an elephant, but while in the temple it repose on a massive silver table, encrusted with gems and festooned with jeweled chains.

Vincent Astor is seriously ill with lung trouble at the country place near New York of Mr. and Mrs. Robert P. Huntington, whose daughter, Helena, he is to marry on April 30th.

South San Francisco Land and Improvement Co.

FOUNDERS OF THE CITY OF SOUTH SAN FRANCISCO

THE SOUTH SAN FRANCISCO LAND AND IMPROVEMENT COMPANY designed in its original plan to make of South San Francisco a great manufacturing center. With that object in view, it originally purchased 3500 acres of land in San Mateo County, on the bay front, five miles south of the city of San Francisco. Since the original purchase, the company has added greatly to its holdings by the purchase of large tracts of adjoining lands, giving to it a perfect environment for the complete development of a great manufacturing city.

The faith which this Company had in its enterprise has been manifest to everyone by the large expenditure it has made in the development of this property. Every foundation which goes to make a perfect condition for manufacture has been already solidly installed, and

SOUTH SAN FRANCISCO

is a rapidly growing city; it is a railroad terminal; it is on the main line of the Southern Pacific Railroad, and accessible to all railroads; has deep water communication; owns and operates for its industries a railroad connecting with the Southern Pacific and the water front; has electric street car service from factory to Town, and direct to San Francisco; has an Electric Light and Power Company; owns an independent Water Works, and has an abundance of fresh water for factory and house; has wharves and docks; a perfect sewerage system; a Bank and a Town Hall; and a population of over 3000 people in an extensive and fine residence district, where everyone may secure lands at reasonable prices and on favorable terms, as homes for themselves and their families.

FACTORY SITES

can be obtained from the South San Francisco Land and Improvement Company on most reasonable terms.

The completion of the Bay Shore Tunnels has placed South San Francisco on the main lines of the Southern Pacific Railroad, and forty passenger trains per day connect it with the outside world.

Owing to the completion of the Dumbarton Bridge and Cutoff, South San Francisco will soon have all railroads which center in San Francisco passing through its midst.

Many industries are already established here, chief of which are the Western Meat Company, the Wool Pullery, the Soap Works, the Steiger Pottery Works, the W. P. Fuller & Co. Paint Works, the South San Francisco Lumber and Supply Company, the Pacific Coast Steel Company, the Pacific Car and Equipment Company, the Standard Corrugated Pipe Works, and other enterprises, all of which are in operation to-day. The Meese Gottfried Machinery Company and the Enterprise Foundry of San Francisco have each recently made purchases of land, and South San Francisco is plainly destined to fulfill all that its promoters had hoped.

For Manufacturing Purposes, South San Francisco Has No Equal on San Francisco Bay

South City Lot Company to Geo. W. Miller—Lot 6, block "S," Peck's Subdivision, South San Francisco.

South City Lot Co. to J. J. Carmichael—Lot 3, block F, Peck's Subdivision, South San Francisco.

CALIFORNIA INVENTORS.

The following patents were just issued to California clients reported by D. Swift & Co., Patent Lawyers, Washington, D. C., who will furnish copies of any patent for ten cents apiece to our readers.

Clarence E. Anable, Sacramento, paper cutter; Marston W. Bush, Willets, spring board; Samuel Chase, Los Angeles, signaling device; Albert R. Derge, Oakland, burglar proof screen; Antone E. Dotta, Loyalty, bearing; A. R. Encinas, San Francisco, lock nut; Charles Gore, San Francisco, speed indicator for automobiles; R. Kusamura, Kings county, motor boat; G. F. W. Schultze, Oakland, coin controlled mechanism; Reginal C. Schmidt, Oakland, orchard heater; William V. Yandel, Los Angeles, tow-truck wagon.

LETTER LIST.

List of letters remaining unclaimed at the postoffice at South San Francisco, Cal., April 16, 1914:

Domestic—Bordisso, C.; Devencenzi, A.; Grilli, A.; Garcia, Berato; Ruffoni, G.

E. E. Cunningham, Postmaster.

H. Labourdette has just lowered the price of his place on Baden avenue, which is for sale. It has never been offered at such a low price before. Will sell on terms. For information, see local real estate agents, or write H. Labourdette, Eden Vale, Santa Clara county, Cal. Advt.

For Sale—Pure bred Buff Leghorn eggs. \$1.00 a dozen. Mrs. W. Hyland, 417 Linden avenue. Advt.

COUNTY DEVELOPMENT ASSOCIATION NEWS

LOCAL HAPPENINGS.

(Continued from Page 1.)

kotter. Miss Elkerenkotter received many beautiful gifts.

It is understood the Pacific Gas and Electric Company contemplates making extensive improvements to its system in this district at a cost of \$100,000.

Last Sunday the locals met defeat at the hands of the D. N. & E. Walters, but will endeavor to "come back" when they cross bats with the Soldiers of Company G, Presidio. Admission 15 cents, children 10 cents.

The following additional political announcements appear this week in The Enterprise: Geo. H. Buck for superior judge, C. D. Hayward for county assessor and Geo. A. Kneese for county surveyor.

Jesse Monize, Joe Carrera and Julie Bianchi are being congratulated upon the success which attended them when, with drums, guitar and banjo-mandolin, they furnished music for the dance Thursday evening.

A number of young fellows of this city styling themselves as The Millionaires will give a ball to-night in Knowles Hall, at Daly City. The boys are all popular and success is sure to attend their efforts. General admission 25 cents.

The young people of this city are anxiously awaiting April 25th, when a grand ball will be given in Metropolitan Hall by Panama-Pacific Exposition Lodge, No. 5, A. A. of I. S. and T. W. of North America. Admission 50 cents, ladies free.

Most of the articles stolen from John Marley's pool room recently have been regained from a pawn shop on East street, San Francisco. Coincident with the finding of the articles was the discovery of the fact that they were located in the same place from which Mr. Marley had obtained some clothes which were stolen from him a year ago in San Mateo.

Thursday evening about 9 o'clock, while returning from a visit to friends, Mrs. C. Bianchi, mother of Julie Bianchi, and Mrs. De Marchi were held up by two men near the Episcopal Church. The thugs obtained nothing. A little later the same night, Geo. Carigisenis was held up by two men, one of whom was about 5 feet 10 inches tall and the other short. As in the previous case the highwaymen obtained nothing for their pains.

Two houses opposite each other on Baden avenue, near Spruce, occupied by Italian laborers working at the pottery, were entered and robbed last night. The occupants of one house, A. Bonnino, F. Julio, Tony Filippi lost \$139.50 among them. The doors of the house, both of which had been locked, were found standing open this morning and the men found their empty purses in the yard. The men in the other house Joe Secco, L. Carlotto, C. Genverni and G. Grossi lost \$462.

The student body of the local high school met last Monday. Reuben Smith was elected athletic manager and Walter Money manager of the track team. A team will journey to Berkeley soon to participate in the great inter-scholastic meet. It is hoped that our boys will win place in it. A committee was also chosen to prepare a luncheon to be given next Thursday.

VETERAN GLOBE TROTTER LECTURES AT SCHOOLS.

Thursday afternoon the students of the local grammar and high schools were entertained by a lecture by Major Gustave Schoof, squadron sergeant-major of the Twenty-third Alberta Rangers of Canada, ex-major of the Mexican army under the late President Madero, war correspondent in the revolution of 1913-14, honorary member of General Poncho Villa's staff, veteran of two South African wars and commander of the Boy Scouts.

Besides narrating many of his experiences in Mexico, Africa and Canada, he exhibited skins and relics which he has collected in the different countries. The grammar school students especially enjoyed the talk, several of them parading in the different uniforms in which the major has fought.

METHODIST CHURCH EASTER SERVICES

An unusually large congregation attended the Methodist Church Sunday night to listen to the Easter program rendered by the children of the Sunday school. The teachers of the different classes had trained their young folks in song and recitations, so that to hear them was to rejoice in the splendid work the school is doing through the children. "A tree is known by its fruits." So a public institution is known by the product which it turns out upon society. The Sunday school teaches boys and girls what real goodness is and how to attain that goodness through obedience to Christ's teachings and faith in Him as their Saviour and Lord. Truth-telling, pure-minded, kindly-dealing boys and girls are a blessing in the home and the school and everywhere. The Sunday school is founded for the study of God's Word—the Holy Bible—and through obedience to its teachings the highest type of noble living is made possible.

The Easter program emphasized, of course, the culminating truth of the Gospel that Christ arose from the dead. As the apostle Paul said, "If Christ be not risen, then is our preaching vain, we are yet in our sins, and are of all men most pitiable. But now is Christ risen and become the first fruits of them that slept."

The pastor spoke of three important words relating to life which impress us at this time. Birth is the first great word we have to deal with. The coming of an infant into a home is the time of greatest joy. The new life makes its helpless appeal to all around it. It wins the hearts of everybody who cares for it. All pain is forgotten in the thought that a child has come into the home to bless it and add to its happiness. The second great word is regeneration. This word means being born again, as Christ said, being born from above. This relates to the change which takes place in the life of any person at conversion. The Master said there was joy in heaven in the presence of the angels over one sinner that repented. So we see the spiritual birth of a soul brings joy into heaven in much the same way as a human birth brings joy into a home. But, in addition, the soul that is born into the Kingdom of God is also filled with joy. The third great word is resurrection. This word means living again. Christ was slain by his enemies and was placed in a tomb, but he broke the bands of death and arose from the dead. His rising from the dead is the promise to the race that we also by faith in Him shall some day be raised to life again. This hope of the resurrection of the body is the glorious inheritance of the Church. The thought that death should end all is most abhorrent to a normal mind. But Christ has settled that question by saying, "I am the Resurrection and the Life. He that believeth in Me, though he were dead, yet shall he live."

ROAD BOND OPPONENTS CHANGE THEIR MINDS

According to reports Henry T. Scott, William H. Crocker and other citizens of Hillsborough, who recently filed a petition with the San Mateo county board of supervisors against the proposed purchase of \$100,000 worth of state highway bonds to aid in extending the state highway down to Los Angeles, have changed their minds.

It is said they now favor the purchase and will appear before the board of supervisors in Redwood City next Monday to urge in carrying out the plan.

Their changed attitude is due to the fact that several days ago Scott and other Hillsborough residents chanced to meet a state highway commissioner, who explained the financial situation. The understanding is that it is now up to the county

to buy at least \$100,000 worth of state road bonds, which bear 4 per cent interest, that the work of building the coast highway may be expedited.

Chairman William H. Brown of the board of supervisors, Henry T. Scott, city trustee of Hillsborough, and City Attorney A. H. Redington conferred Saturday on the question.

Indications are that the county will carry out its original intention of purchasing state bonds at a financial loss. The county probably will purchase the bonds at par, though the market value is only 96.

WANT MRS. TAGGART'S DEATH INVESTIGATED

A coroner's jury in San Francisco, sitting in the case of Mrs. Mary Taggart, widow of a former Redwood City physician, who ended her life last week, has returned a verdict that Mrs. Taggart killed herself in a fit of "dependency over financial troubles due to business transactions with one Lynton McIntosh." The jury recommended that the district attorney investigate the transaction "as there appears to be some irregular phase connected with it which we believe was the motive which led to the commission of the act of suicide."

VISITING PRIEST PRESENTED WITH CANE

Father D. A. Sullivan at Burlingame Receives Gift from W. H. Underhill.

Following the 11 o'clock mass at St. Catherine's Church, in Burlingame, last Sunday, Rev. Father D. A. Sullivan, O. M. I., the visiting missionary, was presented with a hand-some black hawthorne cane by William H. Underhill of San Mateo.

Underhill presented the cane, which he received from a friend traveling in Ireland, as a token of remembrance. Father Sullivan comes from Lowell, Mass., and is a leading missionary priest of the Catholic Church.

WHERE THE DIAMONDS LIES.

Governor Francis McGovern of Wisconsin tells this one:

"A representative of Illinois, who never lost an opportunity to expatiate upon the glories and material prospects of Chicago, was one day holding forth in his usual strain when he touched upon the part played by the railroads in that prosperity.

"Statistics show," declared the member from Illinois, "that 1,150 trains arrive daily in Chicago. These trains, run by some twenty odd companies, carry over 165,000 passengers. The railroads have undeniably been a strong factor in making Chicago what it is today."

"Whereupon a senator from New York smilingly interjected:

"That's an awful charge to prefer against the railroads!" —Lippincott's.

War In the Air.

During the hottest fighting at the battle of Chickamauga an owl, alarmed by the unusual sounds, was frightened from its usual haunts. Two or three crows spied him and made pursuit, and a fight in the air followed. The contest was observed by a soldier. He dropped his gun to the ground and exclaimed:

"Whew! Even the very birds in the air are fighting!"

A "shocking" condition of affairs down in Orange County was disclosed by a complaint filed with the Railroad Commission by the Yorba Linda Water Company against the Pacific Electric Railway Company. The complaint alleges that the railway company is willfully and unlawfully permitting its electricity to steal back to the power stations on the water company's pipes. The result is to cause the pipes to fall to pieces and to create all kinds of havoc along the line with the water company's customers.

The tracks run parallel to the pipes between Richfield and Stern stations. The company is accused of using the pipes for a conductor of the return current. Mischievous detachments of the power juice are said to get mixed up frequently with the water supply around Richfield and to cause the thirsty live stock of Orange County ranchers to perform sudden and extraordinary antics.

227 Grand Av. South San Francisco

NOTICE OF PUBLIC WORK.

Notice is hereby given that on the 14th day of April, 1914, the Board of Trustees of the City of South San Francisco passed its certain resolution of Intention to order the following street work to be done in said city, to-wit:

That Grand Avenue be produced westwardly and opened to a uniform width of Eighty (80) feet from the present northwestern termination of said avenue or street, as shown on that certain map entitled "South San Francisco, San Mateo Co. Cal. Plat No 1," which map was filed in the office of the County Recorder of the County of San Mateo, March 1, 1892, the original of which map is on file therein in Book "B" of Maps at page 6, and a copy thereof is recorded in Book 2 of Maps at page 52, westerly to the northeasterly boundary line of the Mission Road.

The lands necessary and convenient to be taken for said purposes are described as follows:

Beginning at a point which is distant North 70 degrees 27 minutes West, 80 feet from the Northwest corner of Block No. 78 of said Map of South San Francisco, Plat No. 1; running thence North 74 degrees 27 minutes West, 208.17 feet, thence on a curve to the left with a radius of 80 feet, 48.86 feet, thence south 70 degrees 33 minutes West, 127.7 feet, thence on a curve to the right with a radius of 410 feet, 242.18 feet, thence North 75 degrees 28 minutes West, 1134.97 feet, thence on a curve to the left with a radius of 120 feet, 90.76 feet, thence South 61 degrees 11 minutes 54 seconds West, 175.52 feet to the northerly line of the Mission Road, thence along the said line of the Mission Road North 44 degrees 15 minutes West, 83 feet, thence North 61 degrees 11 minutes 54 seconds East, 196.62 feet, thence on a curve to the right with a radius of 200 feet, 151.27 feet, thence South 75 degrees 28 minutes East, 1134.97 feet,

thence on a curve to the left with a radius of 330 feet, 195.73 feet, thence North 70 degrees 33 minutes East, 127.7 feet, thence on a curve to the right with a radius of 160 feet, 97.73 feet, thence South 74 degrees 27 minutes East, 208.17 feet, thence South 15 degrees 33 minutes West 80 feet to the point of beginning containing 3,805 acres more or less.

In said resolution of intention said Board of Trustees thereby determined and declared said proposed work and improvement to be of more than local or ordinary public benefit, and that said proposed work and improvement will affect and benefit the whole of said city, and that the boundaries of the said district of lands to be affected are assessed to pay the damages, costs and expenses of said work and improvement shall include the whole of said city, and that therefore the entire damages, costs and expenses of said work and improvement shall be made chargeable and assessable upon the whole of the taxable property of said city.

All streets and roads herein before referred to are shown upon the said map entitled "South San Francisco, San Mateo Co. Cal. Plat No. 1," which map was filed in the office of the County Recorder of the County of San Mateo, March 1, 1892, in Book "B" of Maps at page 6, a copy of which map is recorded therein in Book 2 of Maps at page 52.

Said resolution of intention was passed and adopted in pursuance of the provisions of that certain act of the Legislature of the State of California, entitled, "An act to provide for laying out, opening, extending, widening, straightening, or closing up, in whole or in part, any street, square, lane, alley, court or place within municipalities, and to condemn and acquire any and all land and property necessary or convenient for that purpose," approved March 6, 1889, and the several acts amendatory thereof or supplemental thereto.

For further particulars, reference is hereby made to said resolution of intention on file in the office of the City Clerk of the said City of South San Francisco.

This notice shall be published by four (4) successive insertions in "The Enterprise," a weekly newspaper published and circulated in said city of South San Francisco, and being the newspaper designated by said Board of Trustees for such publication.

South San Francisco, California, April 17, 1914. GEORGE A. KNEESE, 4-18-4t Superintendent of Streets.

UNFAMILIAR FACES

Historical Characters of Whose Looks We Know Nothing.

THEY LEFT NO PORTRAITS.

Many of the Famous Figures and Heroes of Colonial and Revolutionary Times Are as Blanks to Us So Far as Their Personal Appearance Is Concerned.

In the search for a portrait of Thomas Willett, the first mayor of New York, the committee from the City Club visited nearly every print dealer in the city in addition to scores of private collectors of Americana. But there was no portrait to be found.

Any one who has ever attempted to make a collection of the pictures of the big men of early New York soon realizes that there are many blanks. For instance, of the four Dutch governors Peter Stuyvesant is the only one of whom we have a correct portrait. Of Peter Minuet, William Kieft and Wouter van Twiller there is absolutely nothing accurate, although various caricatures have appeared from time to time.

The same is true of a still more eminent New Yorker, William Bradford, the first printer, who founded in 1725 the New York Gazette, which was the first newspaper printed in the province. Bradford was so prominent a man and so active for years, both in Philadelphia as well as in New York, that it is rather surprising not to have something worthy of being called a true portrait. If there was, perhaps his features might be on the tablet erected on the site of his printing office, now of the Cotton Exchange, at Hanover square.

The lack of an authentic portrait of Nathan Hale, the martyr spy of the Revolution, is somewhat better known, although the sculptors MacMonnies, Partridge and others have not allowed this to restrain them from depicting the features of the young soldier in stone or bronze. Of Colonel Ethan Allen there is no known portrait, and the same is true of the doughty warrior, General Nicholas Herkimer.

One of the heroes of Bunker Hill, Colonel Richard Gridley, has left no portrait. He was the artillerist and engineer who built the fortifications the night before the battle. Other prominent Revolutionary fighters of whom no pictures exist are Colonel William Ledyard, the defender of New London, who was killed by a British officer when Ledyard surrendered the fort; General Thomas Conway, leader of the notorious cabal to depose Washington from the command of the army in 1777; Colonel Seth Warner, who was prominent in the attacks on Ticonderoga and Crown Point and in the battle of Bennington; General Seth Pomeroy of Massachusetts, and General Samuel Holden Parsons, one of the board which tried Major Andre and was appointed by Washington as the first judge of the northwest territory.

No accurate portraits exist of two of the fifty-six signers of the Declaration of Independence, John Morton of Pennsylvania and John Hart of New Jersey, although a portrait which is said to be that of Hart hangs in Independence Hall in Philadelphia and is said to have been painted from a miniature.

There is nothing extant of the father of George Washington, Augustine Washington, nor have any portraits been discovered of Colonel Ball, father of Mary Washington, mother of the general, or of John Dandridge, father of Washington's wife, Martha Washington.

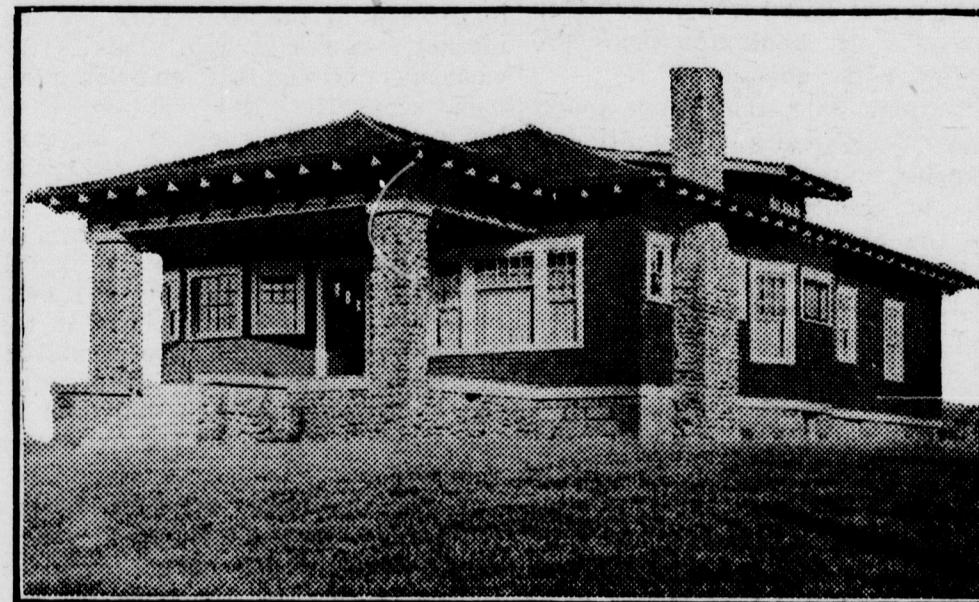

A portrait which a great many collectors of old New York material would give a good deal to obtain is that of Samuel Fraunces, the West Indian tavern keeper, whose best known house was the old Fraunces' tavern, now owned by the Sons of the Revolution, restored since they purchased it a few years ago to its original condition. It is on lower Broad street, on the corner of Pearl street, and the famous long room in which Washington took farewell of his officers has been restored as closely as possible to its original form.

There is no portrait of William Cunningham, the heartless keeper of the provost jail in a corner of City Hall park during the Revolution. Betsy Ross, the celebrated maker of the first stars and stripes, has no portrait. Captain Miles Standish is among those who have left nothing of their personal appearance, nor is anything known of the intrepid French explorer Joliet, who traced the sources of the Mississippi.

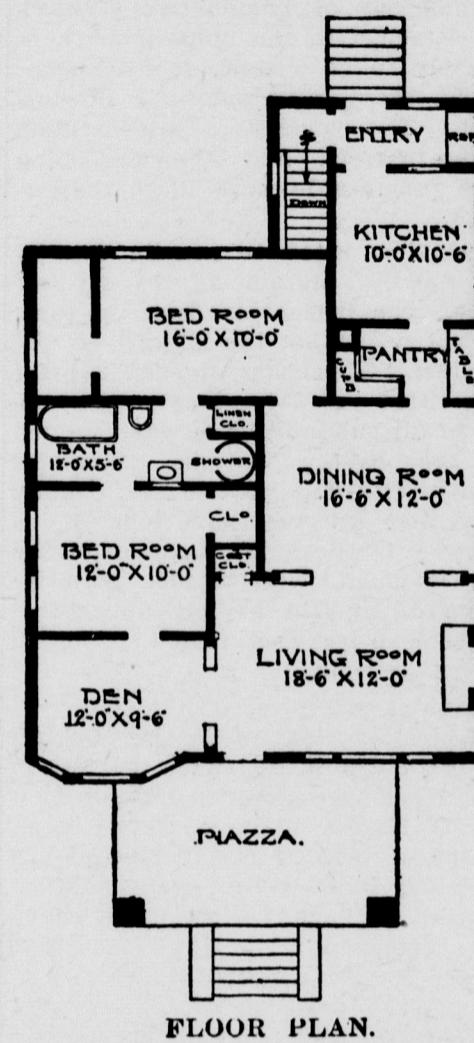

Others of more or less note of whom there are no portraits are the old English dramatist, Christopher Marlowe;

BUNGALOW WITH STONE PORCH.

Design 783, by Glenn L. Saxton, Architect, Minneapolis, Minn.

PERSPECTIVE VIEW—FROM A PHOTOGRAPH.

This home is located in the state of Washington and makes a very complete and modest dwelling. The architect wishes to call attention to the big piazza which may be screened in in the summer time and sashed in in the winter time, making a livable porch the year round. The piazza is 20 feet wide and 12 feet deep. The size of the house is 32 feet wide and 36 feet deep over the main part. Finished throughout in gumwood or Washington fir; birch or maple floors throughout entire house. Full basement, 7 feet 6 inches in the clear; first story, 9 feet. Cost to build, exclusive of heating and plumbing, \$2,200.

Upon receipt of \$1 the publisher of this paper will furnish a copy of Saxton's book of plans, "American Dwellings." It contains about 250 up to date designs of cottages, bungalows and residences costing from \$1,000 to \$6,000.

Richard Savage, another well known English dramatist, who died in 1743; Marquis Duquesne, from whom Fort Duquesne, now Pittsburgh, got its first name from the French; George Clinton, royal governor of New York from 1743 to 1753 and father of the British general in the Revolution, Henry Clinton; Colonel John Henry Cruger, General Oliver de Lancey, Governor William Tryon, General John Forbes, Baron Dieskau, General Robert Howe and Bourrienne, Napoleon's famous secretary, who wrote an excellent life of the great French emperor.—New York Times.

BURIED UNDER PAPERS.

Between Litter and Fires Life In De Quincey's Home Was Lively.

De Quincey's greatest extravagance grew out of the morbid value he set upon papers and their not being disturbed. He was in the habit of accumulating these until, in his own words, he was "snowed up," which meant that when matters reached such an extremity that there was not a square inch of room on the table to set a cup upon and no possibility of making his bed for the weight of papers gathered there; no chair which could be used for its legitimate purpose, and the track from the door to the fireplace, always kept open until the last, was completely obliterated so that he had not even place in which to set his foot—then De Quincey locked the door upon his paper treasures and turned elsewhere. At his death there were at least a half dozen such places "papered" by him and being maintained at no small expense.

Such a thing had been experienced as his actually "papering" his family out of house, but in later years his daughters learned how to guard against such a contingency.

De Quincey usually spent the evenings with his family, who looked forward to these hours with much pleasure. Upon the arrival of the newspaper he would render the news in his own quaint manner, questioning the various members of the group about him and illuminating the various subjects touched upon with a wealth of memories, good stories or human experiences until the happiest flow of real conversation sprang from the circumstances of the moment.

He was not a tranquilizing companion for nervous persons to live with, as those nights were the exceptions on which he did not set fire to something.

WHEN THEY DREW LOTS FOR DEATH

A quiet little man, grizzled and a bit full in the waist, as if he had long lived a life of physical inactivity and ease, sat in a New York club and told, without a sign of emotion, a stirring Civil War incident. He had been one of Col. John S. Mosby's most trusted troopers, and the tale he told has found its way into published history along with decorated broderies omitted from the version of the teller, although he played an important part in the affair.

The summer of 1864 found the Confederacy fighting with desperation against great odds and without real hope, and Mosby's command, officially a Virginia regiment but practically an independent organization, was especially active on the flanks of the Union forces in Virginia and West Virginia. Sheridan had written several times that summer to Grant complaining of the annoyance he suffered from Mosby, and threatened summary vengeance upon the guerrillas.

Finally, in Mosby's temporary absence, part of his command attacked by mistake a strong column of Custer's cavalry. Finding that they had to do not with a few hundred of the enemy but with several thousands, the guerrillas took the desperate choice of cutting their way out. In executing this maneuver some of Mosby's men, while passing a Federal officer unhorsed at the roadside fired at the fallen man. He was grievously wounded but he lived long enough to complain to Custer, and his commander resolved to make the incident the excuse for settling a long score with Mosby.

Custer picked out six of the guerrillas captured in the fight to be hanged by way of retributive justice and example. These six men were marched through the little village of Front Royal with halters around their necks, one of them accompanied by his mother pleading with tears for his life. On the outskirts of the village they were hanged, and a placard on the breast of one declared that thus should all of Mosby's men be treated.

Mosby wrote to General Lee reporting the incident and asking authority to retaliate when the opportunity should come to deal out like treatment to six of Custer's command. Mosby's request came back to him in due time by the hand of his adjutant with the written consent of Lee and countersigned by the Confederate secretary of war as "cordially approved." Thus fully armed with official authority Mosby awaited his chance, for he was determined that his vengeance should fall upon Custer's men.

It was perfectly well known throughout the command that when next any of Custer's troopers should fall into Mosby's hand there would be a painful reckoning. Late in the autumn of 1865 Mosby, in the course of a raid into the Shenandoah Valley, came into hostile touch with Custer and made 26 of the enemy prisoners.

"We rode into Rectortown," said Mosby's grizzled adjutant, "early on a brilliant autumn morning with our 26 prisoners disarmed in the midst of the command. In the course of the retreat Mosby had told me what he intended to do and how it was to be done."

"When the men had dismounted he ordered me to make all arrangements and went off to breakfast at the house of a friend. After we'd had breakfast I drew up the prisoners in line, according to orders, and taking 26 prepared slips of paper, 20 blank and six numbered, I placed them in a hat and had each prisoner shut his eyes and take out a slip while our men stood by looking on."

Published accounts say that at least one of Mosby's troopers, a man famous as the leader of many a desperate charge, broke into sobs as the drawing went on, and that the whole command was deeply moved. The grizzled adjutant was silent on these points, nor did he say aught of a young lieutenant named Brewster who, having drawn a blank, persuaded his comrades to ask for another drawing of lots because one of the six who had drawn numbered slips was a drummer boy of barely 16, desperately frightened at the prospect of death. One of the luckless six, as a matter of fact, was such a boy, and his fate seemed so cruel that the ad-

jutant suspended operation and went to consult Mosby. The result was an order for a new drawing of lots.

"That second drawing," said the adjutant, "was the hardest job that ever fell to my lot. This time we left out the drummer boy who had drawn a numbered slip and another of about the same age who had drawn a blank and put into the hat 18 blank and six numbered slips.

"That evening the six condemned to die were sent across the mountains with a small trusted escort, men who knew the trails and could carry out their task and get back to Rectortown with practical certainty of evading the Yankees. Their orders were to take the prisoners to a point on the pike near Berryville, where it was known that Custer's command would pass next day, execute sentence and leave them with a proper placard.

"The six dead troopers were left leaning against a big tree near the pike with the announcement that they were executed in retaliation for Custer's hanging of our six men. There Custer found them when he passed next day. The escort came back safe to Rectortown."

Published accounts say that Lieut. Brewster drew a numbered slip at the second drawing, but escaped as by a miracle the fate of his five comrades. According to this version of the story the escort with the doomed men met on the way Capt. Mountjoy of Mosby's command returning with prisoners from a raid into the Shenandoah Valley and that Brewster gave Mountjoy the Masonic signal of distress.

Mountjoy, who was a Mason, responded by substituting one of his prisoners for Brewster and took the latter back across the Blue Ridge to safety. Mosby was reported as protesting with vigor that his command was no Masonic lodge. This picturesque detail again was omitted from the account of the grizzled adjutant and he no longer lives to say what is to be taken as the actual truth of history.

TELEGRAPHING

FROM THE FIELD

Weighing only six and one-half pounds, and packed in a leather case the size of a field glass, a complete telephone, which may also be used for telegraphing, has been adopted by the signal corps of the United States Army under the name of a "service buzzer," says February Technical World Magazine.

The telephone is of the usual construction, modified to economize space, and is capable of transmitting speech up to the limits of commercial transmission. The telegraph features include a sending key, which may be used whether the case is open or closed, an induction coil, condenser and two small cells of dry battery. When the key is operated a high-frequency alternating current is established in the secondary winding of the induction coil, which projects through the line wire to the distant instrument.

The telephone is of the usual construction, modified to economize space, and is capable of transmitting speech up to the limits of commercial transmission. The telegraph features include a sending key, which may be used whether the case is open or closed, an induction coil, condenser and two small cells of dry battery. When the key is operated a high-frequency alternating current is established in the secondary winding of the induction coil, which projects through the line wire to the distant instrument.

SAN BRUNO NEWS.

The Spottswood family have leased Mr. Calkins' cottage and will occupy it on the 1st.

Mr. Jensen of Lomita Park has been very ill from a case of ptomaine poisoning last week. He is still unable to work.

The friends of Dr. W. C. Evans, the district superintendent of the Methodist Church, regret to learn of his severe illness.

Baseball Sunday, April 19th, at 2 p.m. The San Brunonites and the Travelers of Sausalito, at fourth addition ball grounds.

The two-months-old baby of Mr. and Mrs. Gibson of Lomita Park was buried Wednesday, death resulting from pneumonia.

Mr. and Mrs. Calkins and family of Huntington leave on the 1st for Nevada City, where Mr. Calkins will be employed in future.

On May 2d, there will be a May day dance in Green's Hall, given by the Volunteer Fire Company. Good time, good music and good refreshments.

Be out to-night and have a good time at the "Big Barn Dance" given by the Yeomen. Good music. Refreshments and a general good time. Admission 25 cents.

High class motion pictures at Green's Hall, San Bruno, every Sunday evening and Sunday matinee. Admission, adults 10 cents, children 5 cents. Show at 8:15 p.m., matinee 2:30 p.m. Advt.

Mr. Adams of Huntington Park, whose son has been afflicted with curvature of the spine, had him removed to the children's hospital to have him encased in a plaster cast. He is slowly improving under this treatment.

San Bruno lots for sale. \$225 up. Nothing done, balance \$5 a month. No interest. No taxes. Also houses bought, sold and exchanged. For particulars see L. M. Pfluger. Take San Mateo car and get off at San Bruno crossing. Advt.

Last Sunday was Easter Sunday in the M. E. Sunday school. The entertainment by the children was a great success. Miss Burr's class gave a surprise—an Easter scenic interior background, which was nine feet high and twenty-seven feet long of Easter lillies and the Cross, which was very beautiful.

The Ladies' Aid Society gave a dinner last Wednesday to the school children and adults. These luncheons are proving very popular, from the increased attendance at each affair. The ladies' object is to provide warm lunches to the school children once a month, also to others who care to partake.

The San Mateo County Center of California Civic Betterment held a meeting in Colma Hall Tuesday, April 14th. All the ladies interested in the improvement of the county of San Mateo were urged to take part in that movement.

Mrs. Pfeifer, mother-in-law of Mr. Roy, will build a \$5000 moving picture house on San Mateo avenue, between the Madden grocery and Schmidt's meat market. The arrangement will be similar to the Burlingame house. Mr. Roy will be the business manager.

San Mateo county began its fight in the superior court last Tuesday to have the Spring Valley Water Company bury its flume which carries San Francisco's water supply through San Bruno. After a day spent in taking testimony on both sides, Judge Sargent of Monterey county, who is sitting on the case, continued it until April 27th. When the pipe line was built in the early eighties the Spring Valley Water Company secured permission to run its flume along the San Bruno road, which was then a toll road. Since then the road has become the main street of the town of San Bruno and residents have to climb over the six-foot flume to get from one side of the street to the other. It is estimated that the cost of burying the flume or removing it will be \$30,000.

COURT NEWS.

Wood C. Baker against William Murdy, for medical attention.

M. N. Maurer against W. L. Roberts, for bread and sweets, \$45.

Ivan W. Keith against James Cassi, for medical bill of \$58.75.

BALLOON GOWNS DAZZLE NEW YORK

Hosiery Adorned With Lace Ruffles

First you take one of your most matronly relative's skirts, or even a pair of pop's pet pants, providing pop boasts of an old-guard waistline. Then you whittle away most of the material down near the street line, and tack these snippings on to the upper elevation of your skirt model. Finally you fuss and fool and fiddle with this upper, or hip-hurrah section of the garment until the upper skirt sags sadly around you like the sides of a rhinoceros that has been dieting for a spell. And now the ankle section of the skirt fits like the skin of the rhino's horn and there you are!

This recipe for planning the superstructure of your this-year's gown could not be learned during the Easter parade, of course, until Fifth avenue, New York, had begun to recover a bit from the tumultuous late noon crush.

After a lass had been horned out of the church crowd press, blown up again, patted and re-wrinkled properly you at last got her general lines. She began at the sky line with a pie-plate of fine straw for a lid, sometimes left just as it had been shaped to hold the pie, only worn upside down; again worried and crimped around the edges until it looked like the flat mansard of a soft-shell crab.

Temporarily passing by the face without the slightest comment, one's eye encountered the amber beads in layers. Now and then the bead necklace seen was not amber, but ropes of sapphires, green, purple, garnet or dark blue beads. South from the beads and until the materialistic bilious of the hip-hip-hip part of the skirt modeled on Ma's was reached, one usually noticed a dinky coat that might have been fashioned after little brother Cyril's, with a bit of a tail and other doodads added.

Hosiery adorned with lace ruffles and pantalettes were two novelties in feminine attire much in evidence at Atlantic City when inquisitive breezes toyed with what should have covered them. The breezes revealed that more than a score of women were wearing stockings that bore tiers of lace clear to the knees—in two or three instances even higher—and more than a dozen women were seen to be wearing pantalettes—in most cases of colors to contrast attractively with the outer attire—beneath their slit skirts. Gorgeous colored vests were also worn.

GENERAL NEWS EVENTS

Florenz Ziegfeld, Jr., the well-known theatrical manager, producer of "The Follies" and other musical comedies, and Miss Billie Burke, the Frohman star, now playing in "Jerry" at the Lyceum Theater in New York, were married in Hoboken a few days ago.

A cablegram from Sofia, Bulgaria, received by William Caspar, representative of Queen Eleanor, now in New York, states definitely that the Queen will sail for New York on May 21st. Arrangements had progressed too far to permit her to sail earlier, as had been suggested.

Two new cases of bubonic plague were discovered in Havana recently. Both persons attacked are Spaniards. They are isolated at the Las Animas Hospital. Dr. John Gutierrez, chief sanitary officer of Havana, says the most stringent sanitary measures will be enforced in order to prevent a spread of the plague.

Blas Casanova, who was said to be the oldest man in Cuba, died a few days ago at Congojos at the age of 120. He was born in Africa in 1794, and was brought to Havana when a boy as a slave. He was a friend of ex-President Gomez, and visited the latter while he was chief executive. His age is said to have been authenticated.

Harry Kendall Thaw's petition for a writ of habeas corpus was granted by Judge Edgar Aldrich of the United States District Court at Concord, N. H. The court said, however, that no order would be issued for the prisoner's discharge from custody until arrangements have been completed to take the case to the United States Supreme Court on appeal.

Organizers of the International Chorus Girls' Alliance are at work trying to organize 1500 or so of the chorus girls in New York City, and said that 200 of them have been organized in the alliance up to date, and are pre-

paring to demand recognition of the union in at least one opera house. The demand for union recognition is to be made individually on the management of a theater or opera house as soon as the chorus of each theater or opera house is organized.

Damages estimated at \$25,000 has been done by the Colorado River in the last two weeks to that part of the Imperial Valley irrigation project that lies south of the Mexican line, according to reports reaching El Centro, Cal. The damage, it was said, consisted of the undermining of the west bank of the river to such an extent that 1000 feet of the old levee fell into the channel. This undermining is believed by miners to have been caused by a deflection of the current of the river by jetties constructed by the reclamation service.

Publication of a formula of the nitrate of silver treatment for home use for curing the cigarette habit is to be made in the monthly bulletin of the Portland, Ore., health department, the weekly school bulletin, the Oregon Agriculturist, and in the State Board of Health publications, according to plans of the anti-cigarette committee of Portland. Dr. John G. Abele, the physician who offered to give the treatment gratuitously if means were provided for securing the supplies, reported that he had answered 150 letters during the past month, mostly from adults.

It is announced in London that another development of the slit skirt is the "slit stocking." The opening assumes various shapes and positions from an elongated oval, beginning at the instep, to a slender V-shaped slit of greater length. The opening is laced with very fine bands of silk thread, of the same color and texture of which the stocking is made. These are crossed backwards and forwards sufficiently wide apart to make the nature of the slash apparent. In some styles the edges of the slash are laced with narrow insertions of brightly colored ribbons.

Revelations of the existence of an active revolutionary society among Chinese of Vancouver and Victoria have come to light in the police investigation of the murder of Mrs. Charles J. Millard by Jack Kong, a Chinese boy under 20 years of age. Mrs. Millard was killed ten days ago in her home at Vancouver, and her body cut to pieces and fed into the furnace. An investigation brought to light jewelry hidden in the basement of the Millard home. The police are now of the opinion that the young Chinese murderer was stealing regularly from the Millards to get money to make contributions to funds sent regularly to "White Wolf," the bandit who is now laying waste towns and villages in Northern China.

Woes of an Old Time Writer.

High among unconventional writers stands William Prynne, a London journalist in the days when there were no journals, days when a bulky pamphlet took the place of a letter to one's favorite newspaper. Prynne published about 200 of such pamphlets and is said to have averaged a sheet of print a day throughout his life. And he worked in a quilt cap coming over his eyes to shield them from the light, and stuck at his table all day, being served with a roll and a pot of beer every three hours. And he reaped the reward of his literary efforts in the branding and pillory and ear cropping that every political writer risked in that age.

Cards and the Calendar.

Playing cards in their makeup are akin to the calendar. The two colors are red and black, which answer to the equinoxes. The suits are four, answering to the four seasons. The twelve court cards answer to the twelve months; the fifty-two cards answer to the number of weeks in the year; the thirteen cards in each suit represent the number of weeks in a lunar quarter.

Honesty in Golf.

The sooner a boy, or a man for that matter, learns to live up to the motto "Honesty is the best policy" in golf, as in other things, the better for him. There is no game which gives a competitor a better opportunity to cheat. But for that very reason there is no game in which the cheat, when discovered, as it usually is sooner or later, is looked upon with greater contempt.—Francis Ouimet in St. Nicholas.

Under the Table.

It is surprising what a lot of useful space is usually allowed to go to waste under the kitchen table. Why should it not be utilized? Brass hooks screwed into the under side of the wood might be used to support pails and other cumbersome and not exactly slighty utensils, which are allowed to stand about, getting in one's way and making the kitchen look untidy.

BILL FOR OIL MEN BEFORE THE HOUSE

Aims at Relief of Operators Occupying Unpatented Lands

Representative Church has introduced a bill for the relief of the California oil operators occupying unpatented lands in the state, most of this land now being in suit between the operators and the government. The bill meets the views of the oil operators, it is stated, and if enacted into a law would be a compromise measure between the government and the operators. The most important clauses in the bill are:

Upon relinquishment to the United States within six months by any locator or his successors of a claim to unpatented oil or gas lands upon which drilling operations were in actual progress January 1, 1914, of the claim to which the land was initiated prior to July 3, 1910, the Secretary of the Interior shall lease to such locator or his successors lands so relinquished not exceeding a maximum area of 2560 acres to any one person, association or corporation, said leases to be conditioned upon the payment of a royalty not exceeding one-eighth of the oil or gas produced, each lease to be for a period of twenty years, with the preferential right in the lease to renew the same for succeeding periods of ten years upon reasonable terms and conditions.

The Secretary of the Interior is authorized to make such rules and regulations as he may deem proper for carrying the act into effect. Failure of any lessee or of his successor to comply with the lease shall cause forfeiture of the holding.

HUNTING THE CARIBOU.

Curiosity Often Lures the Watchful Animal to its Fate.

In hunting the caribou quietness is essential. Never break a twig if you can avoid it, for a cracking branch makes a noise which carries far and may give warning of your approach to the very stag you particularly want. Equally important is it to keep a sharp lookout at all times, especially when entering a barren, where a stag may be sleeping, for under such conditions they are hard to see. Among the numerous gray dead stumps and moss covered low trees the color of the caribou is so inconspicuous that the untrained eye will fail to detect the animal even at close range. The first intimation will be a glimpse of a disappearing patch of white as the caribou vanishes into the woods.

All these things considered, the caribou of Newfoundland is not as alert as any other deer that I know of and is therefore more readily approached. There is, of course, great variation among them, some being extremely alert and difficult to stalk, while others are so absurdly tame that they will allow a man to walk right up to within a few yards before taking flight. Curiosity is often a noticeable failing with them. When once it is aroused they will go to almost any length to satisfy it. I do not, however, advise the hunter to count too much on it, for the very thing which you imagine will tempt this curiosity will as likely as not frighten them away. Sometimes a strange noise will make them very inquisitive, and they will come within a few feet to find out what it is. Then, occasionally, a white handkerchief will have the same effect.—A. Radcliffe Dugmore in "The Romance of the Newfoundland Caribou."

Misleading Bookkeeping.

Even bookkeeping is not an exact science. For behold! how often is it that one man will put into the expense account a given expenditure—say, the rebuilding of a machine—thus reducing his profits by this amount, while another will put such an item to the asset account, and each can advance weighty arguments and reasons as to the logic of his methods. But the net results of operation will differ widely with the same actual occurrences, so that even bookkeeping may be said merely to present results dependent upon the aspects of the situation as rendered by those who have the authority or opportunity to interpret.—Benjamin A. Franklin in Engineering Magazine.

Points of the Crescent Moon.

Why does the moon sometimes appear with points turned upward and at other times downward? There is one cause only—the rotation of the earth. If the moon rises with points turned upward then, when it sets, the points must turn downward—that is, the western horizon meets the points in its apparent approach; they point toward it, apparently downward, in the western sky.—New York American.

MME. CAILLAUX.

Wife of France's Ex-Minister of Finance Killed Calmette.

Boiling the Kettle.

Mrs. Campbell had engaged a new maid. "Martha," said the mistress on the first morning, "be careful always to boil the teakettle before making the tea."

Martha signified her willingness and, after an absence in the kitchen, returned to her mistress and said:

"Please, mum, there's nothin' big enough to boil the taykettle in, 'less 'tis the wash boiler, sure."—National Monthly.

SAN FRANCISCO PRODUCE MARKET

Latest Conditions and Prices of Seasonable Products of California

DECIDUOUS FRUITS—Apples, per bx: Newtown Pippins, 4-tier, \$1.50@ \$1.75; do, 4½-tier, \$1.25@\$1.75. Oregon Apples—Extra fancy Spitzenbergs, \$2 @ \$2.25; do, fancy, \$1.75@2; do, choice, \$1.40@\$1.65; Newtown Pippins, \$1.50@ \$2.
